## Using Powershell "Start-Transcript/Stop-Transcript" commands

July 31, 2007

These two Powershell commands can help you capture and save what you have type during your Powershell session:

### Start-Transcript and Stop-Transcript.

Start Powershell

PS>

At the prompt, type:

PS> **Start-Transcript** c:\temp\CaptureDemo.txt

{this command need a filename to store you sesion data}

Now, type any command:

PS> Get-Service

And:

PS> Get-Service | Get-member

Then, stop the transcript:

PS> **Stop-Transcript**

To view the result change directory to C:\Temp then use the Powershll command "ii":

PS> CD C:\Temp

PS> ii C:\Temp\capturedemo.txt

This command "ii" will open notepad and display the content of the file.
